

Passionate Computer Science & Design undergraduate with a strong interest in Frontend Development, UI/UX Design, 3D Animation, and AI-assisted development. Experienced in building responsive web applications and creating immersive digital experiences using modern technologies. Skilled in React.js, JavaScript, Node.js, Blender, and GitHub. Eager to contribute technical and creative skills through internship opportunities and real-world software projects.

SKILLS

- HTML5
- CSS3
- JavaScript
- Responsive Design
- CSS Animations & Transitions
- Node.js
- Express.js
- Firebase
- Supabase
- Java (OOP)
- Python
- Blender
- UI/UX Principles
- Figma
- AI Image Generation
- Git & GitHub
- VS Code
- Vercel
- Prompt Engineering
- AI-Assisted Development
- Rendering
- Cycles

EDUCATION

Sethu Institute of Technology

Kariyapatti

Bachelor of Engineering - Computer Science & Design

Completed Second Year with Distinction. Actively exploring Web Development,

AI tools, and 3D Design.

ACCOMPLISHMENTS

- Completed Second Year with Distinction.
- Built multiple responsive frontend projects using React and JavaScript.
- Developed expertise in AI-assisted development workflows.
- Active GitHub contributor with web development and creative repositories.
- Created 3D animation and visualization projects using Blender.

PROJECTS

- Interactive Web Experience: Developed responsive and interactive web applications with smooth animations and modern UI components, implemented dynamic layouts and user-friendly experiences, and focused on performance optimization and accessibility using React.js, Three.js, GSAP, and Node.js (with AI Tools).
- Blender Animation - UFO Encounter: Created a 3D animated scene featuring penguins and a UFO in an arctic environment, applying modeling, texturing, lighting, and animation principles to produce visually engaging renders and animation sequences using Blender. (Source in Portfolio)
- 3D Product Visualization: Designed photorealistic product renders and interactive visualizations, built assets suitable for e-commerce and web integration, and explored WebGL-based product viewing experiences using Blender and Cycles. (Source in Portfolio)
